

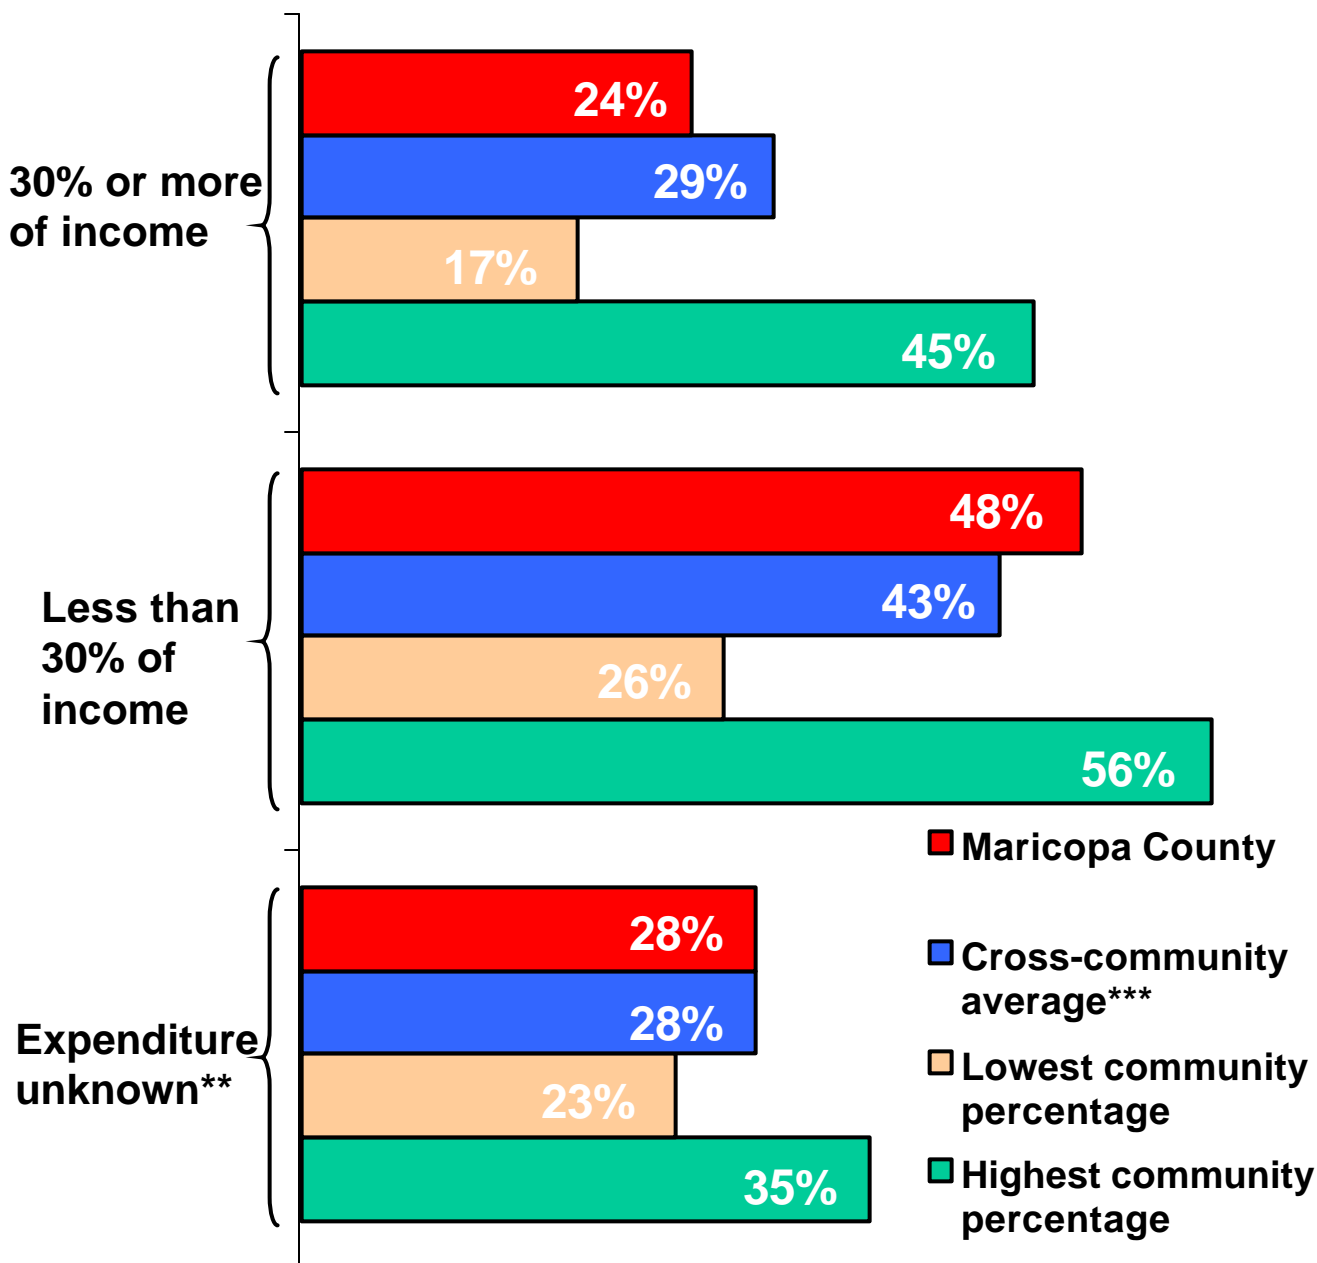

Figure 1.4

ALL-COMMUNITY COMPARISON

Percentage of people age 65+ who spend $\geq 30\%$ / $<30\%$ of their income on housing*

* Annual housing expenditure was calculated based on outlays for rent or mortgage, real estate taxes, association/condo fees, and utilities as a percentage of income. Participants for whom sufficient information was not available were classified in the category expenditure unknown.

** In national surveys, about one fifth to more than one third of survey respondents are reluctant to provide sufficient information necessary to calculate their income (Moore, J.C., Stinson, L.L., & Welniak, E.J., Jr. *Income measurement error in surveys: A review*. [On-line]. Available: <http://www.census.gov/srd/papers/pdf/sm97-05.pdf>)

*** The cross-community average was obtained by calculating the percentage for each separate community, then summing these percentages and dividing by the total number of communities.
