

MARICOPA COUNTY

Figure 9.1

The majority of people are aware of some services in their area. Nearly nine of ten (88%) are aware of a Senior Center, and more than three of four (77%) say that Hospice care is available in their area. Seven of ten (70%) are aware of Meals-on-wheels, and more than three of every five (63%) are aware of Congregate Meals. Over one-half are aware of Homemaker (54%) and Home Health Aide (53%) services. However, more than one-third (35%) do not know if Homemaker services exist in their area and two of five (39%) are unaware of Home Health Aide services. Half (51%) do not know about Home Repair services, and three of five (59%) are unaware of Respite services in their area.

Note: Indicator 9 corresponds to Questions 56A-I on the AdvantAge Initiative Survey questionnaire.

MARICOPA COUNTY

Figure 9.2

Figure 9.2 shows the percentage of people age 65+ who are unaware of most (five or more out of nine) services in their community. Overall, more than one of four (27%) people are unaware of most services. Figure 9.2 also shows differences by demographic characteristics. People age 65-74 and non-whites are more likely than their counterparts to be unaware of most services (29% vs. 24%; 30% vs. 26%, respectively). The difference in awareness is minimal within the gender, poverty status, and household type categories.

MARICOPA COUNTY

Figure 9.3

Figure 9.3 shows additional differences by demographic characteristics. People age 65+ without friends in the neighborhood are more likely to be unaware of most services than those with friends in the neighborhood (34% vs. 24%). People with a high school or lower education, and those in excellent, very good, or good health are more likely than their counterparts to be unaware of most services (31% vs. 24%; 28% vs. 21%, respectively).

Note: HS=high school; Ex=excellent; vg=very good; ADL=activities of daily living; IADL=instrumental activities of daily living.
