

# MARICOPA COUNTY

**Figure 17.1**

In Maricopa County, more than two of five (43%) people age 65+ say that there was a time in the past year when they thought they needed medical care because they felt sick. Of those, more than nine of ten (95%) people have seen a medical professional for this reason. Five percent did not obtain the needed care. Some of the reasons cited for not obtaining needed medical care were: Not wanting to bother the doctor; attributing symptoms to aging; taking over the counter medication; and inconvenience.

*Note: Indicator 17 corresponds to Questions 42 and 43 in the AdvantAge Initiative survey questionnaire.*
