Figure 23.1

## Percentage of people age 65+ with adequate assistance\* in activities of daily living (ADL)

Note: Percentages may not add up to 100% due to rounding and/or missing information.

\*People were asked whether they need assistance with the following activities (ADLs): taking a bath or a shower, dressing, eating, getting in/out of bed/chair, using/getting to a toilet, getting around inside the home. Those who answered "yes" were asked whether they get enough assistance with these activities.

Unweighted N=619  
Weighted N=351422

Center for Home Care Policy and Research  
*Visiting Nurse Service of New York*

Participants who answered "yes" to a screener question inquiring whether they have a problem or need assistance with activities of daily living (ADLs) were subsequently asked about their need for assistance with each of the following activities: taking a bath or a shower, dressing, eating, getting in and out of a bed or a chair, using or getting to a toilet, and getting around inside the home. In Maricopa County, one of thirty (3.3%) people age 65+ need help with one or more ADLs, and one of forty (2.5%) have one or more unmet needs. An unmet need was defined as not getting help or not getting *enough* help with one or more ADLs. (For differences by demographic characteristics, see Indicator 10.)

Note: Indicator 23 corresponds to Questions 72a-b, 73a-b, 74a-b, 72d-f, 73d-f, 74d-f, 72h, 73h, and 74h in the AdvantAge Initiative survey questionnaire.

Figure 23.2

Figure 23.2 shows the percentage of people age 65+ who need help with each of six activities of daily living (ADLs). People are more likely to need help getting in and out of a bed or a chair (1.7%) and taking a bath or shower (1.2%). People are less likely to need help eating (0.6%) and using or getting to the toilet (0.5%).
