Figure 21.1

## Percentage of people age 65+ who know whether palliative care services are available\*

Note: Percentages may not add up to 100% due to rounding and/or missing information.

\*People were asked whether end of life or hospice care service is available in their area.

Unweighted N=619

Weighted N=351422

 Center for Home Care Policy and Research  
Visiting Nurse Service of New York

 ADVANTAGE  
Initiative

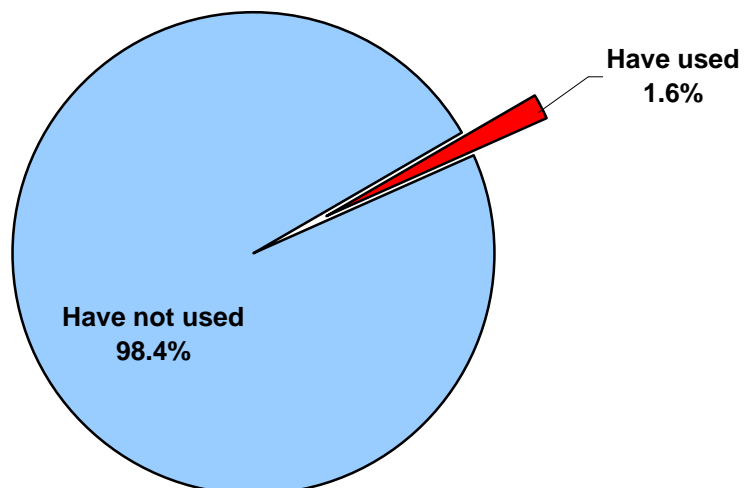

In Maricopa County, nearly one of five (18%) people age 65+ do not know whether palliative (end of life or hospice) care is available in their area. More than three of four (77%) say that the service is available, and five percent say that it is not.

Note: Indicator 21 corresponds to Question 56i and 58i in the AdvantAge Initiative survey questionnaire.

# MARICOPA COUNTY

Figure 21.2

## Percentage of people age 65+ who have used palliative care services\*

Note: Percentages may not add up to 100% due to rounding and/or missing information.

\*People were asked whether they had used end of life or hospice care in the last 12 months.

Unweighted N=619

Weighted N=351422

In Maricopa County, only 1.6% of people age 65+ say that they have used palliative (end of life or hospice) care in the last 12 months.
